

Creating transformational impact with
measurable outcomes

Integrated IT Infrastructure Management Platform

Infraon ITIM ensures better IT availability & performance
across networks, servers, apps, CCTVs, Wi-Fi, cloud, and more.

Infraon ITIM – SaaS-based platform to boost vendor-neutral ITIM efficiency

Weak ITIM agility and resilience can lead to fragmented mission-critical infrastructure. And if reactive data analytics is all you have, you can do nothing about it.

Infraon ITIM is an enterprise-grade ITIM platform to improve your IT infrastructure availability and performance. Using just one platform, you can track IT devices, networks, servers, apps, CCTVs, Wi-Fi, cloud systems, SDWAN. Free multiple teams from using different tools with reduced workflow complexities, better service health, and timely alerts

What sets us apart?

Infraon ITIM offers actionable intelligence by unifying data across email/web and servers. Unearth individual component insights and create a single source of IT infrastructure truths to improve spending, maintenance, upkeep, etc. You can also eliminate downtime, outages and other disruptions with integrated, real-time alerting and notification capabilities.

More Reasons to use Infraon ITIM

- ✓ Establish configuration and compliance management
- ✓ Use rapid 'scan/search' to discover inventory endpoints
- ✓ Get a 360-degree view of IT operations with advanced data visualization
- ✓ Increase IT infrastructure uptime with inbuilt resolution capabilities

Key highlights

- ✓ Use a single command center to manage events, incidents, requests, etc.
- ✓ Harness predictive insights to improve server management
- ✓ Better plan potential replacement, refurbishment, or end-of-life costs

Empower support teams to be customer-centric

One platform to monitor all things IT

Being unable to track, pinpoint, and resolve IT infrastructure issues can disrupt business continuity, cause user frustration, etc. Monitor IT networks, servers, applications, APIs, websites, URLs, and ports from one location.

IT infrastructure management done right

Working with multiple vendors to handle different parts of your IT infrastructure is likely to cause multiple process headaches. Seamlessly switch between critical workflows – easily managing inventory and SLAs.

Insights for multi-vendor ITIM efficiency

A bird's eye view of your infrastructure ecosystem means that it's crunch time for your ITIM performance. Use templated dashboards with multi-department and CXO visibility features to get valuable IT insights.

Inbuilt fault management

Converting faults to relevant incidents is important to stay on top of availability and performance issues. Unlock ITIL based incident and fault management features to enable quicker resolution of IT incidents.

About Infraon Corp

Infraon Corp is a wholly-owned subsidiary of EverestIMS Technologies. Infraon provides an integrated SaaS-based product suite to help enterprises and telecom service providers automate their digital transformation journeys. With the Infraon platform, it becomes easy to scale modernization across simple or complex IT and network infrastructures.
