

Creating transformational impact with
measurable outcomes

An All-In-One Enterprise Modernization Suite

Infraon Infinity is a fully integrated SaaS product suite
to modernize your IT operations & services
management.

Infraon Infinity – one platform to maximize ITOM & ITSM power

**Working with multiple vendors to modernize & manage your infrastructure?
You must be tired of poor user experiences, disparate workflows & recurring IT issues.**

Infraon Infinity is a low-code product suite to synchronize IT operations & services. Start your single vendor journey - from onboarding IT assets and performance monitoring to incident management, single-click analytics, and more. Be powered by the latest AI and ML technologies with cross-product integration capabilities. Take a stress-free approach to modernization – based on your business priorities and budgetary constraints.

Unlock the power of Infraon Infinity

Infraon Infinity ensures UI consistency to accelerate user adoption. So, your teams can seamlessly toggle or switch between our products without a learning curve. You don't need costly resources or never-ending training programs. Our products are low-code and don't require internal business users to be certified.

Improve asset availability & performance

- ✓ Easily manage negotiations, renewals, cancellations, etc.
- ✓ Get on-demand scalability, rapid deployment & low licensing costs
- ✓ Authorize & track remote compliance risks
- ✓ Bridge workforce & enterprise goals with end-to-end automation

Key highlights

- ✓ Auto discover IT assets or load non-IT assets to a single CMDB
- ✓ Monitor the uptime of assets & services from one location
- ✓ Manage all genuine issues as incidents
- ✓ Get complete analysis on capacity & usage patterns

A fully-integrated, feature-packed platform

Manage assets without relying on multiple vendors

Managing hardware and software asset lifecycles is demanding while working with multiple software. Infraon Infinity offers full control over your asset lifecycles. Maximize your asset ROI with integrated data insights.

Go spreadsheet-less with workflow automation

Spreadsheet-intensive processes can make life hard for internal teams. With Infraon Infinity, you can automate key workflows with pre-built templates/ accelerators. Use KPI-focused dashboards to accelerate deployment and streamline daily operations.

Tackle network issues in real-time

Poor connectivity or downtime can directly affect your business. Infraon Infinity remotely scans network devices to identify pattern-based faults and resolves them with integrated incident management.

Seamlessly manage SLAs

Heterogeneous SLA management can lead to serious availability issues. Infraon Infinity provides unified SLA management based on ITIL best practices. Configure protocols, set rules, and monitor at-risk asset SLAs – with support for business hours and holidays.

About Infraon Corp

Infraon Corp is a wholly-owned subsidiary of EverestIMS Technologies. Infraon provides an integrated SaaS-based product suite to help enterprises and telecom service providers automate their digital transformation journeys. With the Infraon platform, it becomes easy to scale modernization across simple or complex IT and network infrastructures.
