

Creating transformational impact with  
measurable outcomes

# Lay The Foundation for Digital Transformation With the Infraon OSS Suite

# Infraon Digital Transformation Suite

## Infraon IMS

Monitoring of heterogeneous networks spread across distributed locations. Manages IT and non-IT components spread across multiple sites through a simple Map-Monitor-Manage technique.

## Infraon UNMS

A powerful integrated platform that directly targets discreet technologies in Telecoms & Enterprises collecting critical performance data from the entire IT setup. Integrates with multiple EMS/NMS for the unified management of multiple technologies like Transport, IP Core & Access Layers.

## Infraon Desk

A Pink-Elephant Certified IT Service Management tool available as in both on-premises & SaaS models. Simplifies IT Service Desk & Business Service Management with a superlative ticketing system, quick access knowledge base, automated workflow management, and real-time tracking & reporting through a highly efficient unified platform.

## Infraon NCCM

Empowers compliance, auditing and accountability. Complete network management task automation, vulnerability detection & remediation with standard compliance reports. Correlates audits of how, when, where and by whom changes were administered with rollback options.

## Accelerate Through Our Digital Transformation Triad

At Infraon Corp we help our clients transform their business' through the "Digital Transformation Triad" namely, Customer Experience Digital Transformation, Operational Process Transformation and the Business Model Transformation which we use to rapidly change business paradigms across the world.

Customer Experience  
Transformation

Operational Process  
Transformation

Business Model  
Transformation

## Infraon OSS Suite

Infraon OSS is a comprehensive system that bridges physical to virtualized infrastructure with seamless management of hybrid, Transport, Fiber, IP and Wireless networks. Optimize your infrastructure, automate your operations and monetize your services to increase your competitiveness and become an agile, effective and efficient service provider.

## Infraon OSS offers you

Centralized Operations Management Console | End-to-End Network Visibility | Integrated view of multi-vendor and multi-technology | Mapping of Circuits and Services with Customers | Cross-domain Correlation to identify RCA and SIA | Integrated Service Management and Event Automation Workflow | Service Catalogs | Configuration and Provisioning | Device Modelling and much more.
