infraon

From Visibility to Compliance
Terrabit Consulting's Transformation with Infraon ITAM

About the Client

Founded in 2009, Terrabit Consulting Pvt. Ltd is one of the leaders in the IT consulting industry across multiple regions. They have a robust client base and growing demand for various IT services, including business process outsourcing, digital transformation, testing, and data and analytics services.

With a holistic approach to technology consulting, the company stands as a valuable partner in steering businesses toward digital excellence.

Challenges

Unable to track assets and their usage in real time

Dealing with a labor-intensive auditing process that requires a lot of manual effort

Lack of in-house platform to manage entire asset lifecycle workflow

The Need

Terrabit Consulting Pvt. Ltd was primarily relying on spreadsheets to manage and track their assets. But later on, they found it was a challenging task. They started looking for an effective asset tracking solution to gain visibility across their entire infrastructure.

Also, they wanted to reduce the manual efforts required during the software auditing process.

Another concern was the inability to manage asset lifecycle workflow. So, the client lost visibility and control over assets.

What Infraon Assets Offered

- **Streamlined asset lifecycle management** from requisition to replacement & retirement
- **Bulk asset onboarding** for all types of assets
- **Barcode scan-based audits** to easily find out an asset's location, assigned user, expiry date and more
- **Rapid scan and search** for all assets with automated inventory scanning

- **Effective tracking of IT and non-IT asset locations** – anytime, anyplace
- **Inventory agent installation** to extract insights like usage data – avoid losing network quality/availability
- **Customized asset data reports** and analytics to ensure software compliance.
- **Bird's eye view** on all asset licenses from a single location
