Why Asset Management is important?

CURRENT PROBLEMS

- **Lack** of alignment between **asset visibility**/usage & **business goals**
- **Spreadsheet**-intensive processes – leading to disconnected, **untapped data**
- **No clarity** on organization **Asset value** and upcoming **expenses**

MUST-HAVE CAPABILITIES

- **Controlled** IT & non-IT **asset lifecycles** - from purchase to replacement & retirement.
- Spreadsheet-less **BI insights** based on **integrated datasets**
- Equipped with **automated workflows** for **allocation**, **deallocation**, and renewals

Think that relying on **different vendors** is the answer? Think again

You run around
**managing
multiple vendors**
to maximize
software &
hardware ROI

Your asset data
offer **no insights** –
leading to
**unintuitive
purchasing**
decisions

You face **security
& compliance**
issues due to poor
user verification
protocols

You're **unable to
track** your physical
assets – anytime,
anywhere
